ELECTRIC MUSIC REPORT.

New York Company Preparing To Extend Telharmonium Service.

Local stockholders of the Eastern Cahill Telharmonium Company today received copies of the first annual report of the corporation, which tells in detail the progress made in the electric music field. There is a very considerable amount of local capital invested in this Company and several Baltimoreans are members of the board of directors, among them Messrs. F. C. Todd, A. H. S. Post, H. Carroll Brown and Edwin G. Baetjer. The other directors are Messrs. Oscar T. Crosby of Washington; F. W. Lord of New York, William Skinner of Holyoke, J. G. White of New York and Rear Admiral Charles D. Sigsbee. Mr. Crosby is president of the Company, Mr. Todd vice president, Mr. Post treasurer and Mr. H. F. Stevenson of this city assistant secretary and treasurer.

The report states that the New York Electric Music Company, of which the Cahill corporation is the holding Company, gave public recitals in New York last winter which were attended by about 20,000 people. In addition to these demonstrations, a number of transmissions of music to various places have been effected in New York with much success. Plans for developing the service along broad lines in New York are outlined in detail.

In addition to the extension of the service of music in New York city, it is the intention of the Cahill Company to establish companies in various cities to market music. The telharmonium, or electric music machine, was invented by Dr. Cahill of Holyoke, Mass., and has attracted attention from all parts of the world. It is possible to operate the keyboard on the machine and supply music to thousands of homes at the same time. In many respects the service is similar to that of the telephone, the music being transmitted to subscribers over private wires and being obtainable whenever the subscriber may desire
